Wireless Food Safety Monitoring Solution

OVERVIEW:

The ThingsEye Intelligent Food Safety Monitoring Solution is designed to maximize Food/Goods Quality and Efficiency with 24/7 monitoring.

ThingsEye Food Safety Solution can ensures your customers receive healthy, good-tasting food; saves money and reduces food waste and helps employees be more productive.

The Solution is base on innovation wireless technology to minimize the devices cost, installation & maintaining cost and provide the wide coverage.

Easy to deploy and management are very important for IoT solution. ThingsEye has designed a friendly hierarchical management structure to save administrator's work on the solution.

ThingsEye solution support scan to add device. User can just scan and add a new device in several seconds to onboard the sensors.

Specification:

- Long Range Wireless , LoRaWAN,NB-IoT, LTE-M
- Run several years without maintain
- Monitor Temperature/ Humidity or other parameters.
- 5 years data storage
- Hirearchical Management
- Easy to add devices in user side
- Mobile APP support

5 x Steps to set up:

- Power on sensors & Gateway
- Connect Gateway to Network
- Select a dashboard template to create
- Scan to add sensors
- Scan to add Gateway

Features:

Easy to Deply
- Smart Wireless Sensors
- Plug & Play Gateway
- One Scan to deploy

Collaborative Monitoring
- Flexible Dashboards
- Alerts & Notifications

High Precision Measurement:
- High precision sensors
- Reliable readings

24/7 real-time monitoring
- 24 hours/ 7 day monitoring
- Temperature Alarm

User Friendly:
- Friendly Dashboard design
- Customizable Dashboard

Shenzhen ThingsEye IoT Technology Co.Ltd

Room 22B1, ZhongKeBuilding, YueHai Stree, NanShan
NanShan District ; Shenzhen 518000,China
